Reviews

Here is the finest publication we have read right up until now. It is actually written in easy words instead of difficult to understand. It's been written in a remarkably easy way in fact it is only right after I finished reading this book in which basically changed me, modify the way I really believe.

CHOICES IN DEAFNESS A PARENTS GUIDE TO COMMUNICATION OPTIONS

Woodbine House. Paperback. Book Condition: New. Paperback. 400 pages. Dimensions: 8.9in. x 5.9in. x 0.9in. CHOICES IN DEAFNESS, since 1987 the preeminent guide to communication options, is now extensively revised and expanded to provide the complete scope of information parents of children with deafness or hearing loss need. From assessment and diagnosis to medical/audiological treatments, and from the latest types of cochlear implants and procedures to education and technology devices, this new edition presents a balance of research, guidance, and insight from experts and families. Seven new chapters plus a collection of audio files cover: UNIVERSAL NEWBORN SCREENING (implemented in 38 states, this required screening detects hearing loss much earlier, and has doubled the number of children found to have hearing loss) AUDITORY NEUROPATHY (a cause of hearing loss where the timing of sound is seriously disrupted, and which has only recently been understood) GENETIC CAUSES OF DEAFNESS (describes genetic testing and counseling in light of research that shows over 60% of deafness in children is due to genetic or hereditary causes) THE TRANSFORMATION OF DREAMS (explores a shift in emotional outlook experienced by a parent/clinical psychologist upon learning her child is deaf) IDENTIFYING A PROGRAM OF EXCELLENCE (what to look for in an education program for your child in addition to the chosen communication option) COMMUNICATION TECHNOLOGY (services and devices that let deaf people communicate via phone, cell phone, Internet, video) MAKING IT IN COLLEGE (personal accounts of four students about how they communicate and socialize at college) WHAT HEARING LOSS SOUNDS LIKE (a sampling of audio files that simulate what speech sounds like when hearing loss impacts pitch, loudness, and timing) Link to these files at the publishers website). As in the previous edition, CHOICES IN DEAFNESS presents five unbiased approaches to communication--Auditory-Verbal, ASL-English Bilingual, Cued Speech, Auditory-Oral, and...
