

Bioinoculants for Sustainable Agriculture and Forestry

Filesize: 1.85 MB

Reviews

Thorough information! Its this kind of very good read. It is written in basic words and not hard to understand. You won't feel monotony at anytime of your respective time (that's what catalogues are for regarding should you question me).

(Roel Bogisich Sr.)

BIOINOCULANTS FOR SUSTAINABLE AGRICULTURE AND FORESTRY

Scientific Publishers, 2002. Hardcover. Book Condition: New. This book forms the Proceedings of National Symposium and covers different aspects of biofertilizers and biocontrol agents. The contributions are from the leading microbiologists in their respective fields. The book presents a holistic picture of role of microorganisms in plant growth and development on one hand and plant protection on the other. An up-date information is provided in this book. Role of biofertilizers in integrated nutrient management was highlighted and similarly the need of transgenic microbial inoculants for sustainable agriculture was emphasized. A role of ectomycorrhizae in heavy metal tolerance and in reclaiming wastelands was also discussed. Structure and importance of VAM fungi in growth and development of medicinal plants, tomato, sugarcane and millets was elucidated by different workers. A critical review on actinorrhizae was also included. Azospirillum plant association in stress tolerance was elaborated. Need of cyanobacterial biofertilizers for sustainable agriculture is also detailed. Phosphate solubilizing microbes and other microorganisms and plant productivity are dealt in two different chapters. Beneficial effect of Rhizobium on black gram was also given. Management of pests through microbial pathogens including viruses, and VAM fungi was discussed. Management of mites through fungi formed the last two chapters. Contents: 1. Biofertilizers : Their role in integrated nutrient management - K.V.B.R. Tilak 2. Transgenic microbial inoculants for sustainable agriculture- G. Krishna Kishore and A.R. Podile 3. Bioinoculants for sustainable forestry- Jamaluddin 4. Heavy metal tolerance of ectomycorrhizal fungi and utility of metal tolerant EM fungal strains in reclaiming wastelands created by mining operations- Vandana Gupta, Sanjeev Kumar and T. Satyanarayana 5. Different levels of VAM inoculum application on growth and nutrition to tomato in the nursery- G. Mamatha and D.J. Bagyaraj 6. VM mycorrhizal fungi associated with Phyllanthus amarus and Withania somnifera- N. Eranna and D.J. Bagyaraj 7. Impact...
