Book Condition: New. Publisher/Verlag: Springer Netherlands | Since the North American Free Trade Agreement (NAFTA) took effect at the start of 1994, production and trade in goods and services have become ever more integrated in the region. Banking and financial systems thus also must increasingly inform, adjudicate, transact, invest, insure, and intermedi ate all across North America. Presently, however, there is no single, or up to-date source of information on the banking and finance systems of the current NAFTA countries-Canada, the United States, and Mexico. Relying on top specialists from international financial organizations, central banks, regulatory authorities, and universities, this and a companion volume together bridge that information gap. The focus is not just on description but on regulatory and institution-building challenges posed by the opening up of domestic financial markets, and on the political economy of reforms. The ultimate goal is to enhance the process of safe and efficient integration by policies, regulations, and private initiatives that contribute to the welfare of people in North America and beyond. This volume goes into essential detail in assessing banking and finance regulations, supervision, and prudential and operating standards in the NAFTA countries in a global context. | Preface.
