

## The A B C of the Differential Calculus (Paperback)

Filesize: 9.21 MB

### ***Reviews***

*This book is indeed gripping and interesting. It really is rally exciting throgh studying period. Its been written in an extremely easy way and is particularly merely soon after i finished reading this book through which in fact changed me, affect the way i think.*  
*(Aisha Lemke)*

## THE A B C OF THE DIFFERENTIAL CALCULUS (PAPERBACK)

To read **The A B C of the Differential Calculus (Paperback)** eBook, you should click the hyperlink below and download the ebook or gain access to other information which might be in conjunction with THE A B C OF THE DIFFERENTIAL CALCULUS (PAPERBACK) book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: .other words, the circle is a polygon as long as  $\Delta x$  has an; finite value. At limiting value  $\Delta x$  the polygon becomes a circle. Thus, in any right-angled triangle BAC (fig. 7) we have three sides--AC the base, BC the perpendicular, and AB the hypotenuse. The well-known property of the hypotenuse, that the square described upon it is equal to the sum of the squares described upon the other two sides, is proved in the 47th proposition of the first book of Euclid, and is the foundation of the whole science of trigonometry. Flo. 7. The angle  $a$  is supposed to be placed at the centre of the circle of reference; and if AB be the radius, and be assumed = 1, we have the following relations: --Sin  $a$  (the sine of the angle  $a$ ) =  $\frac{BC}{AB}$  =  $\frac{BC}{1}$  = BC (Hence the line BC represents the sine of angle  $a$ ). AC AC base Cos  $a$  (the cosine of angle  $a$ ) =  $\frac{AC}{AB}$  =  $\frac{AC}{1}$  = AC (Hence the line AC represents the cosine of angle  $a$ ). Sec  $a$  (the secant of angle  $a$ ) =  $\frac{AB}{AC}$  =  $\frac{1}{AC}$  =  $\frac{1}{\cos a}$  (Hence the secant is the reciprocal of the cosine), Cosec  $a$  (the cosecant of angle  $a$ ) =  $\frac{AB}{BC}$  =  $\frac{1}{BC}$  =  $\frac{1}{\sin a}$  (Hence the cosecant is the reciprocal of the sine). Tan  $a$  (the tangent of angle  $a$ ) =  $\frac{BC}{AC}$  =  $\frac{\sin a}{\cos a}$  (Hence the tangent and cotangent are reciprocal to each...)
